Lead Contributor: Renu Muthoo

ASCENT - Center for Technical Knowledge (a division of Rand Worldwide Inc.) is a leading developer of professional learning materials and knowledge products for engineering software applications. ASCENT specializes in designing targeted content that facilitates application-based learning with hands-on software experience. For over 25 years, ASCENT has helped users become more productive through tailored custom learning solutions.

We welcome any comments you may have regarding this guide, or any of our products. To contact us please email: [feedback@ASCENTed.com](mailto:feedback@ASCENTed.com).

# Contents

Preface .....	ix
In This Guide .....	xi
Practice Files .....	xiii
Chapter 1: Introduction .....	1-1
Practice 1a Introduction .....	1-2
Chapter 2: Advanced Text Objects .....	2-1
2.1 Annotation Scale Overview .....	2-2
Working with Annotative Styles .....	2-3
Viewing Annotative Objects at Different Scales .....	2-5
Annotation Scale and Model Space .....	2-7
Modifying Annotative Object Scales.....	2-7
Practice 2a Annotation Scale .....	2-10
2.2 Using Fields.....	2-14
Updating and Modifying Fields.....	2-16
Field Settings .....	2-16
Object Fields .....	2-17
Fields in Blocks .....	2-18
Fields in Attributes.....	2-18
Practice 2b Fields.....	2-20
Practice 2c Object Fields.....	2-22
2.3 Controlling the Draw Order .....	2-24
Draw Order.....	2-24
Draw Order of Hatching .....	2-25
Masking Annotation Objects .....	2-26
Adding a Wipeout.....	2-28
Practice 2d Controlling the Draw Order .....	2-30
Chapter Review Questions .....	2-33
Command Summary .....	2-34

---

<b>Chapter 3: Working with Tables .....</b>	<b>3-1</b>
<b>3.1 Working with Linked Tables.....</b>	<b>3-2</b>
Using the Data Link Manager.....	3-5
Updating Table Links .....	3-7
<b>3.2 Creating Table Styles.....</b>	<b>3-9</b>
Table Style Options.....	3-10
Cell Style Options.....	3-11
<b>Practice 3a Working with Tables .....</b>	<b>3-14</b>
<b>Chapter Review Questions.....</b>	<b>3-19</b>
<b>Command Summary .....</b>	<b>3-20</b>
<b>Chapter 4: Projects - Advanced Annotation .....</b>	<b>4-1</b>
<b>Practice 4a Fields and Tables .....</b>	<b>4-2</b>
<b>Chapter 5: Dynamic Blocks .....</b>	<b>5-1</b>
<b>5.1 Working with Dynamic Blocks.....</b>	<b>5-2</b>
Inserting Dynamic Blocks.....	5-3
Modifying Dynamic Blocks .....	5-4
Typical Dynamic Block Grips .....	5-5
<b>Practice 5a Inserting and Modifying Dynamic Blocks .....</b>	<b>5-8</b>
<b>5.2 Creating Dynamic Block Definitions .....</b>	<b>5-12</b>
<b>5.3 Dynamic Block Authoring Tools.....</b>	<b>5-14</b>
Block Editor Contextual Tab.....	5-15
Parameters.....	5-16
Actions .....	5-18
Parameter Sets .....	5-20
Constraints .....	5-21
Labeling Parameters .....	5-22
Testing the Block.....	5-23
Construction Geometry .....	5-23
Applying Constraints in Dynamic Blocks .....	5-24
Creating a Block Table .....	5-26
<b>Practice 5b Creating Dynamic Block Definitions .....</b>	<b>5-30</b>
<b>Practice 5c Creating Dynamic Blocks with Constraints.....</b>	<b>5-34</b>
<b>5.4 Additional Visibility Options .....</b>	<b>5-45</b>
<b>Chapter Review Questions .....</b>	<b>5-46</b>
<b>Command Summary .....</b>	<b>5-48</b>

---

<b>Chapter 6: Attributes .....</b>	<b>6-1</b>
<b>6.1 Inserting Blocks with Attributes .....</b>	<b>6-2</b>
What Are Attributes? .....	6-2
How Attribute Values Are Entered .....	6-2
Retain Attribute Display .....	6-3
<b>6.2 Editing Attribute Values .....</b>	<b>6-5</b>
Editing Attributes One at a Time .....	6-5
Editing Multiple Attribute Values .....	6-7
<b>Practice 6a Inserting and Editing Attribute Values .....</b>	<b>6-9</b>
<b>6.3 Defining Attributes .....</b>	<b>6-13</b>
Attribute Definition .....	6-14
Associating Attributes with Blocks.....	6-16
<b>Practice 6b Defining Attributes .....</b>	<b>6-17</b>
<b>6.4 Redefining Blocks with Attributes.....</b>	<b>6-20</b>
Updating Blocks with New Attributes .....	6-23
<b>Practice 6c Redefining Blocks with Attributes.....</b>	<b>6-24</b>
<b>6.5 Extracting Attributes.....</b>	<b>6-27</b>
<b>Practice 6d Extracting Object Data to a Table.....</b>	<b>6-35</b>
<b>Chapter Review Questions .....</b>	<b>6-38</b>
<b>Command Summary .....</b>	<b>6-40</b>
<b>Chapter 7: Projects - Advanced Blocks and Attributes .....</b>	<b>7-1</b>
<b>Practice 7a Dynamic Block Practice - Desk Unit.....</b>	<b>7-2</b>
<b>Practice 7b Mechanical Attribute Project - Amplifier.....</b>	<b>7-6</b>
<b>Practice 7c Architectural Attribute Project - Door Schedule .....</b>	<b>7-10</b>
<b>Chapter 8: Output and Publishing .....</b>	<b>8-1</b>
<b>8.1 Output for Electronic Review .....</b>	<b>8-2</b>
Plotting Electronic Files .....	8-3
Exporting DWF or PDF Files .....	8-4
<b>8.2 Autodesk Design Review .....</b>	<b>8-8</b>
Viewing Markups in AutoCAD .....	8-11
<b>8.3 Publishing Drawing Sets .....</b>	<b>8-13</b>
<b>Practice 8a Reviewing and Publishing Drawing Sets .....</b>	<b>8-17</b>
<b>8.4 Shared Views .....</b>	<b>8-26</b>
Shared Views Palette .....	8-26
Autodesk Viewer .....	8-28
Measure and Markup .....	8-30

---

<b>Practice 8b Create Shared Views.....</b>	<b>8-33</b>
<b>Chapter Review Questions.....</b>	<b>8-41</b>
<b>Command Summary .....</b>	<b>8-43</b>
<b>Chapter 9: Other Tools for Collaboration.....</b>	<b>9-1</b>
<b>9.1 eTransmit .....</b>	<b>9-2</b>
Transmittal Setups .....	9-4
<b>Practice 9a eTransmit .....</b>	<b>9-8</b>
<b>9.2 Hyperlinks.....</b>	<b>9-10</b>
Using a Hyperlink .....	9-12
<b>Practice 9b Hyperlinks.....</b>	<b>9-13</b>
<b>9.3 Revision Clouds .....</b>	<b>9-15</b>
Revcloud Properties .....	9-16
<b>9.4 Compare Drawings .....</b>	<b>9-19</b>
Compare Toolbar .....	9-20
<b>Practice 9c Compare Drawings.....</b>	<b>9-22</b>
<b>Chapter Review Questions.....</b>	<b>9-25</b>
<b>Command Summary .....</b>	<b>9-26</b>
<b>Chapter 10: Introduction to Sheet Sets .....</b>	<b>10-1</b>
<b>10.1 Overview of Sheet Sets .....</b>	<b>10-2</b>
Understanding the Sheet Set Manager.....	10-4
<b>Practice 10a Overview of Sheet Sets.....</b>	<b>10-9</b>
<b>10.2 Creating Sheet Sets .....</b>	<b>10-12</b>
Sheet Set Properties .....	10-15
<b>10.3 Creating Sheets in Sheet Sets .....</b>	<b>10-17</b>
Organizing Sheets in Subsets .....	10-19
<b>10.4 Adding Views to Sheets .....</b>	<b>10-22</b>
Sheet Views Tab .....	10-26
<b>Practice 10b Introduction to Sheet Sets .....</b>	<b>10-29</b>
<b>10.5 Importing Layouts to Sheet Sets .....</b>	<b>10-37</b>
Create a Sheet Set from Existing Layouts .....	10-37
Importing a Layout to a Sheet Set.....	10-40
<b>Practice 10c Importing Layouts to Sheet Sets .....</b>	<b>10-42</b>
<b>Chapter Review Questions.....</b>	<b>10-45</b>
<b>Command Summary .....</b>	<b>10-47</b>
<b>Chapter 11: Publishing and Customizing Sheet Sets .....</b>	<b>11-1</b>
<b>11.1 Transmitting and Archiving Sheet Sets .....</b>	<b>11-2</b>
Archiving Sheet Sets .....	11-3

---

---

<b>11.2 Publishing Sheet Sets .....</b>	<b>11-4</b>
Publish to DWFx .....	11-4
Control Plotting Output.....	11-6
<b>Practice 11a Transmitting, Archiving, and Publishing Sheet Sets.....</b>	<b>11-7</b>
<b>11.3 Customizing Sheet Sets .....</b>	<b>11-11</b>
Sheet Set Properties .....	11-12
Creating Custom Properties .....	11-14
<b>11.4 Custom Blocks for Sheet Sets .....</b>	<b>11-15</b>
Creating a Title Label Block .....	11-18
Creating a Callout Block.....	11-18
<b>Practice 11b Customizing Sheet Sets .....</b>	<b>11-19</b>
<b>Chapter Review Questions.....</b>	<b>11-25</b>
<b>Command Summary .....</b>	<b>11-27</b>
<b>Chapter 12: Projects - Sheet Sets .....</b>	<b>12-1</b>
<b>    Practice 12a Sheet Sets .....</b>	<b>12-2</b>
<b>Chapter 13: Managing Layers.....</b>	<b>13-1</b>
<b>    13.1 Working in the Layer Properties Manager .....</b>	<b>13-2</b>
Displaying Columns in the Layer Properties Manager .....	13-2
Layer Settings .....	13-5
<b>    Practice 13a Working in the Layer Properties Manager .....</b>	<b>13-10</b>
<b>    13.2 Creating Layer Filters .....</b>	<b>13-14</b>
Using the Filter Tree.....	13-14
Property Filters .....	13-16
Group Filters .....	13-18
<b>    13.3 Setting Layer States.....</b>	<b>13-20</b>
<b>    Practice 13b Layer Filters and Layer States .....</b>	<b>13-25</b>
<b>    Practice 13c Setting Up Layer States (Mechanical) .....</b>	<b>13-28</b>
<b>    Chapter Review Questions.....</b>	<b>13-31</b>
<b>    Command Summary .....</b>	<b>13-32</b>
<b>Chapter 14: CAD Standards.....</b>	<b>14-1</b>
<b>    14.1 CAD Standards Concepts .....</b>	<b>14-2</b>
Creating a Standards File .....	14-2
<b>    14.2 Configuring Standards .....</b>	<b>14-3</b>
Plug-ins .....	14-4
CAD Standards Status Bar Icon.....	14-4
<b>    14.3 Checking Standards .....</b>	<b>14-5</b>
CAD Standards Settings .....	14-6

---

---

<b>Practice 14a Creating, Configuring, and Checking Standards .....</b>	<b>14-8</b>
<b>14.4 Layer Translator .....</b>	<b>14-13</b>
Settings .....	14-14
<b>Practice 14b Layer Translator.....</b>	<b>14-16</b>
<b>Chapter Review Questions.....</b>	<b>14-18</b>
<b>Command Summary .....</b>	<b>14-19</b>
<b>Chapter 15: System Setup .....</b>	<b>15-1</b>
<b>15.1 Options Dialog Box.....</b>	<b>15-2</b>
Options.....	15-3
<b>Practice 15a Options Dialog Box.....</b>	<b>15-7</b>
<b>15.2 System Variables .....</b>	<b>15-10</b>
Some Common System Variables .....	15-11
System Variable Monitor .....	15-12
<b>Practice 15b System Variables .....</b>	<b>15-15</b>
<b>15.3 Dynamic Input Settings .....</b>	<b>15-19</b>
<b>Practice 15c Dynamic Input Settings .....</b>	<b>15-23</b>
<b>15.4 Drawing Utilities .....</b>	<b>15-25</b>
Renaming Named Objects .....	15-25
Drawing Recovery and Repair .....	15-26
Checking a Drawing's Status .....	15-28
<b>Practice 15d Drawing Utilities .....</b>	<b>15-29</b>
<b>15.5 Managing Plotters .....</b>	<b>15-31</b>
Add Plotter Wizard .....	15-31
Plotter Manager.....	15-32
Plotter Configuration Editor .....	15-33
<b>Practice 15e Managing Plotters .....</b>	<b>15-34</b>
<b>15.6 Plot Styles .....</b>	<b>15-36</b>
Concepts .....	15-36
Types of Plot Style Tables .....	15-37
Creating Plot Style Tables.....	15-38
Attaching Plot Style Tables to Layouts.....	15-39
<b>Practice 15f Color Plot Styles .....</b>	<b>15-41</b>
<b>Practice 15g Named Plot Styles.....</b>	<b>15-43</b>
<b>Chapter Review Questions.....</b>	<b>15-46</b>
<b>Command Summary .....</b>	<b>15-48</b>

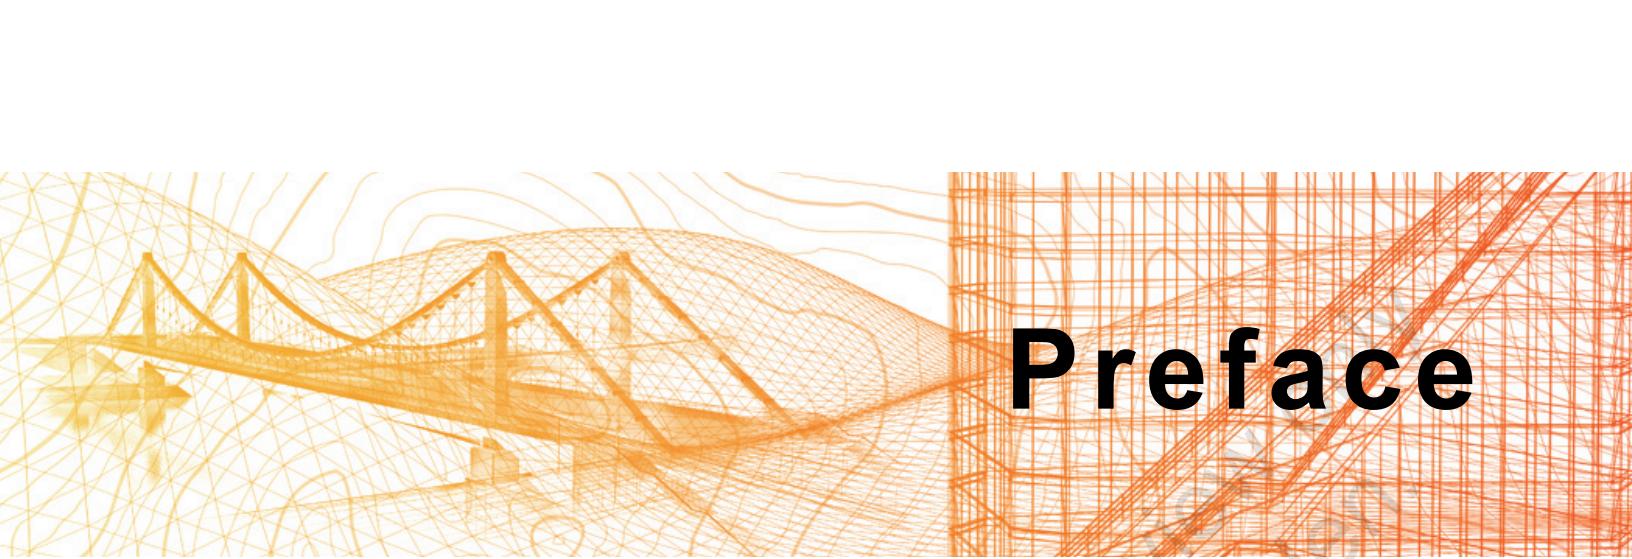

---

<b>Chapter 16: Introduction to Customization.....</b>	<b>16-1</b>
<b>16.1 Why Customize? .....</b>	<b>16-2</b>
Customization Guidelines .....	16-2
What Can Be Customized? .....	16-3
<b>16.2 Creating a Custom Workspace .....</b>	<b>16-4</b>
<b>Practice 16a Setting Up Workspaces .....</b>	<b>16-8</b>
<b>Chapter Review Questions.....</b>	<b>16-10</b>
<b>Command Summary .....</b>	<b>16-11</b>
<b>Chapter 17: Customizing the User Interface .....</b>	<b>17-1</b>
<b>17.1 Using the Customize User Interface (CUI) Dialog Box .....</b>	<b>17-2</b>
Overview of the CUI Interface .....	17-4
<b>17.2 Customizing the Ribbon .....</b>	<b>17-10</b>
Customize User Interface Dialog Box .....	17-11
Ribbon Contextual Tabs.....	17-13
Ribbon Fold Panels.....	17-15
Ribbon Galleries.....	17-17
<b>17.3 Customizing the Quick Access Toolbar .....</b>	<b>17-18</b>
Multiple Quick Access Toolbars .....	17-18
<b>17.4 Customizing Menus .....</b>	<b>17-21</b>
Controlling Menus in Workspaces.....	17-22
Modifying Shortcut Menus.....	17-23
<b>17.5 Keyboard Shortcuts .....</b>	<b>17-25</b>
Mouse Buttons .....	17-26
Customizing Double-Click Actions .....	17-26
<b>Practice 17a Customizing AutoCAD.....</b>	<b>17-30</b>
<b>Chapter Review Questions.....</b>	<b>17-38</b>
<b>Command Summary .....</b>	<b>17-40</b>
<b>Chapter 18: Macros and Custom Routines .....</b>	<b>18-1</b>
<b>18.1 Custom Commands and Macros .....</b>	<b>18-2</b>
Creating a New Command.....	18-2
Command Macro.....	18-3
Special Characters Used in Macros .....	18-4
Button Image .....	18-5
<b>Practice 18a Custom Command Macros.....</b>	<b>18-6</b>
<b>18.2 Running Scripts .....</b>	<b>18-9</b>
<b>Practice 18b Running Scripts .....</b>	<b>18-10</b>
<b>18.3 Action Recorder .....</b>	<b>18-12</b>

# Preface

The *AutoCAD® 2022: Advanced* guide is designed for those using AutoCAD® 2022 with a Windows operating system. This guide is not designed for the AutoCAD for Mac software.

The *AutoCAD 2022: Advanced* guide introduces advanced techniques and teaches you to be proficient in your use of the AutoCAD software. This is done by teaching you how to recognize the best tool for the task, the best way to use that tool, and how to create new tools to accomplish tasks more efficiently.

## Topics Covered

- Advanced text objects
- Working with tables
- Defining dynamic blocks and attributes
- Outputting and publishing files for review
- Collaboration and automation tools
- Creating, publishing, and customizing sheet sets
- Managing layers
- CAD management and system setup
- Enhancing productivity by customizing the AutoCAD interface
- Using macros and custom routines

## Prerequisites

- Access to the 2022.0 version of the software, to ensure compatibility with this guide. Future software updates that are released by Autodesk may include changes that are not reflected in this guide. The practices and files included with this guide might not be compatible with prior versions (e.g., 2021).
- Completion of the *AutoCAD® 2022: Fundamentals* guide, or equivalent experience using the AutoCAD software.

## Note on Software Setup

This guide assumes a standard installation of the software using the default preferences during installation. Lectures and practices use the standard software templates and default options for the Content Libraries.

## Students and Educators Can Access Free Autodesk Software and Resources

Autodesk challenges you to get started with free educational licenses for professional software and creativity apps used by millions of architects, engineers, designers, and hobbyists today. Bring Autodesk software into your classroom, studio, or workshop to learn, teach, and explore real-world design challenges the way professionals do.

Get started today - register at the Autodesk Education Community and download one of the many Autodesk software applications available.

Visit [www.autodesk.com/education/home/](http://www.autodesk.com/education/home/)

*Note: Free products are subject to the terms and conditions of the end-user license and services agreement that accompanies the software. The software is for personal use for education purposes and is not intended for classroom or lab use.*

## Lead Contributor: Renu Muthoo

Renu uses her instructional design training to develop courseware for AutoCAD and AutoCAD vertical products, Autodesk 3ds Max, Autodesk Showcase and various other Autodesk software products. She has worked with Autodesk products for the past 20 years with a main focus on design visualization software.

Renu holds a bachelor's degree in Computer Engineering and started her career as a Instructional Designer/Author where she co-authored a number of Autodesk 3ds Max and AutoCAD books, some of which were translated into other languages for a wide audience reach. In her next role as a Technical Specialist at a 3D visualization company, Renu used 3ds Max in real-world scenarios on a daily basis. There, she developed customized 3D web planner solutions to create specialized 3D models with photorealistic texturing and lighting to produce high quality renderings.

Renu Muthoo has been a Lead Contributor for *AutoCAD: Advanced* since 2016.

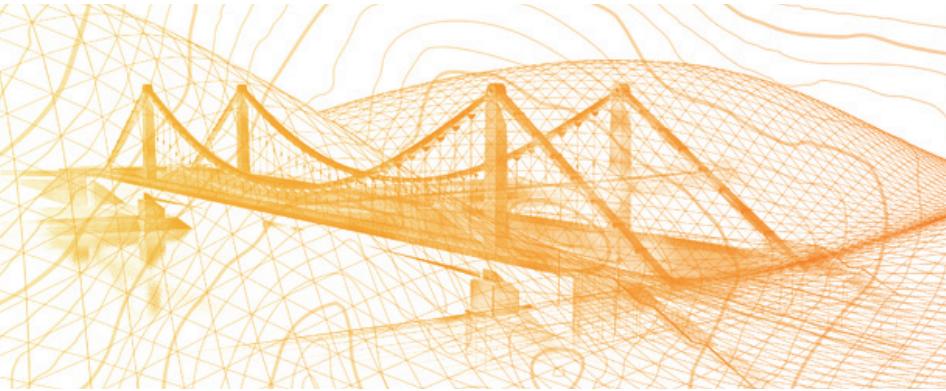

# In This Guide

The following highlights the key features of this guide.

Feature	Description
<b>Practice Files</b>	The Practice Files page includes a link to the practice files and instructions on how to download and install them. The practice files are required to complete the practices in this guide.
<b>Chapters</b>	A chapter consists of the following - Learning Objectives, Instructional Content, Practices, Chapter Review Questions, and Command Summary. <ul style="list-style-type: none"><li>• <b>Learning Objectives</b> define the skills you can acquire by learning the content provided in the chapter.</li><li>• <b>Instructional Content</b>, which begins right after Learning Objectives, refers to the descriptive and procedural information related to various topics. Each main topic introduces a product feature, discusses various aspects of that feature, and provides step-by-step procedures on how to use that feature. Where relevant, examples, figures, helpful hints, and notes are provided.</li><li>• <b>Practice</b> for a topic follows the instructional content. Practices enable you to use the software to perform a hands-on review of a topic. It is required that you download the practice files (using the link found on the Practice Files page) prior to starting the first practice.</li><li>• <b>Chapter Review Questions</b>, located close to the end of a chapter, enable you to test your knowledge of the key concepts discussed in the chapter.</li><li>• <b>Command Summary</b> concludes a chapter. It contains a list of the software commands that are used throughout the chapter and provides information on where the command can be found in the software.</li></ul>
<b>Appendices</b>	Appendices provide additional information to the main course content. It could be in the form of instructional content, practices, tables, projects, or skills assessment.

Sample provided by ASCENT for review only  
All copying and reuse strictly forbidden.

# Chapter

# 1

## Introduction

Learn how to use the AutoCAD® software by completing a practice that will help you familiarize yourself with the structure of the practices available in this training guide, and learn the concepts that you are expected to know.

### **Learning Objective in This Chapter**

---

- Review the use of the AutoCAD software by drawing, editing, and dimensioning a cross-section.

## Practice 1a

# Introduction

### Practice Objective

- Review the use of the AutoCAD software by drawing, editing, and dimensioning a cross-section.

In this practice, you will draw, edit, and dimension a simple cross-section using a variety of tools (such as drawing aids and shortcut menu options), as shown in Figure 1–1. The purpose of this practice is to familiarize you with the style of the practices in this training guide and to review how to use the AutoCAD software.

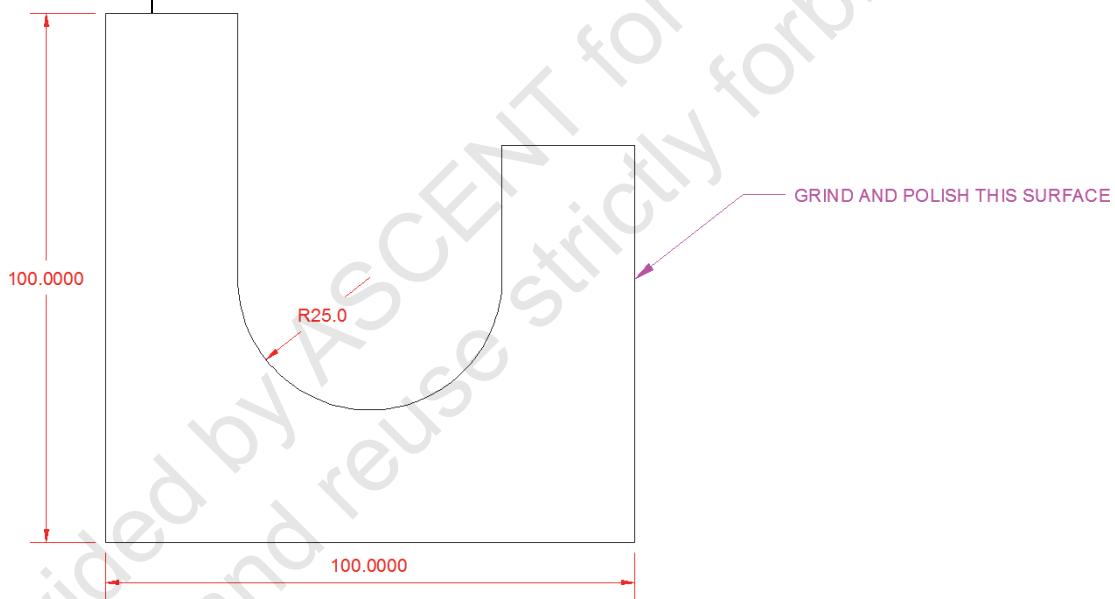

Figure 1–1

If Object Snap is not displayed in the Status Bar, expand (Customization) and select 2D Object Snap.

- Open **Cross Section-M.dwg** from the practice files folder.
- In the Status Bar, expand (Object Snap) and select only **Endpoint** and toggle **Object Snap On**.
- Start the **Polyline** command. Use the **Endpoint** object snap to pick the left endpoint of the top right horizontal line.
- Toggle (Polar Tracking) on if it is not already done.
- Move the cursor straight down, type **25**, and press <Enter>.
- Right-click in the drawing window and select **Arc**. Move the crosshair horizontally to the left, type **50**, and press <Enter> to select a point 50 units to the left.

7. Right-click in the drawing window and select **Line**. Draw a polyline segment straight up and pick the right endpoint of the top left horizontal line.
8. Right-click and select **Enter** to end the command.
9. Without starting another command, select the new polyline object that you just created to display the grips.
10. Right-click, expand **Polyline**, and select **Edit Polyline**. Select the **Join** option. Select all of the other lines in the drawing and press <Enter>. Press <Enter> again or press <Esc> to end the command. Note that the polyline and all the other lines are converted into a single object.
11. Select the polyline object (single object), the leader, and the Mtext note. Right-click and select **Move**. Move the objects **75 units** to the right.
12. In the ribbon, in the *Annotate* tab>Dimensions panel, expand the Layer Control and select the layer **Dimensions**.
13. Create a linear dimension on the bottom of the object and a radius dimension on the arc, as shown in Figure 1–1. When you are done dimensioning, press <Esc> to end the dimension command.
14. Select only the linear dimension, hover the cursor over the dimension grip for the dimension text and select **Above Dim Line** from the multifunctional grip list. The text moves above the line. Press <Esc> to exit the dimension.
15. Select the radius dimension, right-click and change the *Precision* to **0.0**. The text changes to **R25.0**.
16. Add a linear dimension to the left vertical line.
17. Double-click on the magenta text and modify it to say **GRIND AND POLISH THIS SURFACE**.
18. Open the Layer Properties Manager. Select the layer **Object** and set it to be active if it is not already active.
19. Right-click in the Layer Properties Manager and select **Select All but Current**. Freeze the selected layers and close the Layer Properties Manager. Only the PLine object displays in the drawing window without any dimensions or text.
20. Save and close the drawing.
